EDUCATION

Siddaganga Institute Of Technology,Tumakuru   Nov 2022– Jun 2026
Bachelor of Computer Science and Engineering   *CGPA:9.38*

Masters Pu College,Hassan   Mar 2020 – May 2022
12th   *Percentage:98.33*

SKILLS

Languages: C/C++,Python,Javascript
Web Development: React.js, Node.js,Express.js,MongoDB
Developer Tools: Git,Github, VS Code,IDLE python,Jupyter Notebook,Mu Editor,MongoDb compass
Familiar with::Unix and Shell programming,Operating System,Pandas,Numpy,Matplotlib
Course Work::Data structures and Algorithms,DBMS using MYSQL(in-Progress)
Soft Skill::Communication,Problem Solving

PROJECTS

1. Weather-Api

Technology Used: React.js, OpenWeather API   March 2023

Developed for Open-ended Project — Github

- This project is mainly built to provide **current weather data, including temperature, humidity, and wind speed** using the **OpenWeather API** specific to the user's location.
- Overall, this project allows users to quickly check the **accurate weather forecast**, which is useful for making daily planning and decision-making for outdoor activities.

2. FSQuests

Technology used: Html,Css,Javascript,Node.js,Express.js,Jwt Autentication,MongoDB   Nov 2024

Developed for National Level Hackathon by RRIT —Github

- Fitness play an very important role in our daily life To be fit sports and yoga are one of the main source.Me and my team had built a web interface to promote comprehensive physical,mental,and emotional health by providing a wide range of therapeutic resources which includes **audio,talking,laughing,reading and spiritual therapies** to support individuals in achieving overall mental wellness.
- To offer accessible and diverse fitness, we have included **sports** sections which contains the information of different sports activities and also we have included **yoga** section which includes all the kinds of **asanas** and also we have included doctors consultancy sections in which we have provided the information of several doctors which can be useful.

3. TO-DO List

Technology used: React.js,Tailwind css   Sept 2023

Developed for Open-ended Project —Github

- I have developed this interface to enhance user experience by allowing users to easily track and manage trasks without needing a server or account
- In this I have used **localstorage** which helps to enable users to maintain their To-Do list offline,making it accessible and reliable for quick task management

Alongside key projects:I have built projects includes **Tic-Tac-Toe game, Rock Paper Scissor game, Cricket game,Password Generator** −.Github

ACHIEVEMENTS AND CERTIFICATES

- Acheived 50 days streak badge in Leetcode and solved 150+ DSA problems using C++ Language −   Leetcode
- Participated in **National Level Hackathon** conducted by RRIT institute and earned participation certificate
